- What are browsers? How do they render websites? What purpose do HTML/CSS/JS serve

Ans:- Goal of website:

→ Allow one person to talk to another computer.

Goal of website is to allow person to hit one server and get the content of that server and render it.

⇒ HTML Tags:-

<html>

<input>

<i>

<head>

<button>

<title>

<div>

<link>

<a>

<body>

<table>

<main>

→ SPAN vs DIV

SPAN SPAN SPAN

→ can be in one line

DIV

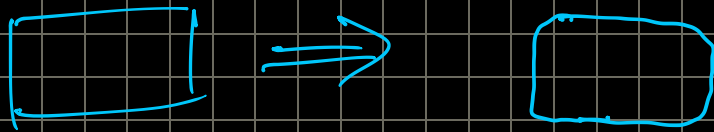

→ different

DIV

line.

⇒ CSS:

border-radius: 10px

border: 2px solid black
padding, Margin

Box-shadow

float = Right

display: flex ⇒ Make everything
next to each other

justify-content: flex-start
flex-end
space-between
space-around
